

Scenario: There has been a wildfire and the police have been going from home to home telling folks to leave the danger... Or a sudden violent summer storm has left several homes damaged and you have been told that until structural assessments are complete you cannot stay in your home.

So you pack up what you need for your family...but oh what about your furry members of the family? Do they have a backpack with supplies too? Where are they going to stay?

'Each community is required to assess its own needs
and develop a plan that addresses those needs.'

Come learn the basics of setting up an animal shelter in your community .
